I think this is my most exciting list ever! From a nice Oak Tree two pence to a blazing mint red 1855 N-9 and a whole collection of nice middle grade coins, there should be something for everyone. Starting with Colonials, in addition to the Oak Tree two pence, I have two Bar Cents,a nice VF20 and a superb EF45; in addition a choice EF Vermont Landscape RR6. Half Cents begin with a example of the rare 1794 C-1a and include a specimen of the extremely rare 1802 C-1. I purchased a nice collection of early dates at ANA and offer them here for the first time. Highlights include a nice EF40 S-65 ex Jack Robinson, a nice G5 1796 S-105, also a choice VF30 1798 S-161, and a condition census 1802 S-237 in AU55. I recently acquired an outstanding collection of middle and late date

including many rare and condition census specimens too numerous to mention. 1820 N-4 VF30, outstanding examples of 1829 N-3,5,7,9, 1839 N-14 CC4, are offered among middle dates as well as examples of 1846 N-23 and 1849 N-30 among lates. But the real story here is th

broad range of material. It's been a while since I have been able to add so many nice middle grade coins. This catalog should truly have something to appeal to every taste and price range. I hope you enjoy looking through it as much as I enjoyed putting it together.

A lot is going on with early copper in the coming few months. My next show is the Long Beach convention October 10-15 and I'll be in St Louis November 7-12. Hope to see some of you there.

WE OFFER THE FOLLOWING TERMS OF SALE

1. All Coins GUARANTEED Genuine - This is a LIFETIME Guarantee!
2. All attributions are guaranteed correct - also LIFETIME Guarantee!
3. The IDENTIFIED POPULATION estimates (RARITY) of varieties change as more pieces of Copper are attributed, and it is IMPOSSIBLE to have an ACCURATE rating! But, we do use the most up-to-date data available - as reflected in "Copper Quotes by Robinson". (COR)
4. STRICT ANA & EAC guidelines are used in grading, which consist of assigning a grade based on the state of preservation/wear of the piece. We then describe the condition of the coin so that you will have as good an idea as possible of what the coin looks like without actually being able to see it in person. It is our intent that there be NO SURPRISES when you receive the coin. Virtually all old Copper has accumulated some marks in their lifetime since leaving the Die/Mint - It is our intent to describe any such marks of significance. We now introduce a new term - VALUE GRADING!!

   Sharpness Grade is far easier to describe in consistent terms, and where there may be circulation defects such as porosity, gouges, rim dings/nicks/bruises, corrosion and other such detractions, arriving at a NET GRADE is certainly subjective at best. The grade that we have assigned on the first line describing each coin is intended to represent this NET GRADE/VALUE GRADE.

   If the Second Line does NOT start with a Sharpness grade, then it is our opinion that the NET GRADE of the coin is the SAME AS the SHARPNESS GRADE of the coin, and that there are NO SIGNIFICANT defects worth mentioning. Perhaps NOT PERFECTION, but whatever marks or other elements that may be present, do not deduct from the over-all appearance/grade of the coin, and are mentioned for accuracy.
5. A Full 30 DAY return privilege is allowed for any or no reason. Our business is based upon attracting repeat customers, and it does none of us any good for you to keep a coin with which you are not completely satisfied. The 30 day period is an approval period, and we welcome any of our customers to show their purchases from us to any other EXPERIENCED EAC member for another opinion. Sales are final after the 30 day period, but we will certainly consider extensions in this time limit upon any reasonable request.
6. All coins are guaranteed to meet ANACS certification for grading! Any coin graded lower by ANACS can be returned within 120 days for immediate refund of the full purchase price plus all ANACS certification service fees.
7. All orders are sent postpaid.
8. Approval service is available to established clients with 7 day terms.

We are always interested in buying Early Copper & Type Coins! If you have coins to sell, we would be happy to have you contact us. We are willing to PAY STRONG PRICES for NICE coins. We will also accept coins on a consignment basis at a reasonable commission. Please feel free to contact either of us with ANY questions that you may have.

Sharpness of about F12 with smooth light brown color. There are some tiny rim bumps K1,3,4,&5 rev. A tiny nick on Liberty's neck, and a few other trivial handling marks consistent wit the grade. This exact coin is described and listed as the fifth finest known of the variety in Walter Breen's Half Cent Encyclopedia p 204. This example first offered in the Tom Elder auction of the R.H. Underhil collection 1/18/29 lot 1116. Then is Stack's Anderson Dupont sale where it was purchased presumably by a agent for Mrs. R. Henry Norweb. Eventually traded to Kenneth Rendell, Paul Weinstein, Philip Benedetti. Next appearing in Kagin's auction 3/13/67;12, Bowers Dennis Irving Long Collection;1021. Head and shoulders above the wretched Nelson Page Aspen specimen sold in last years ANA sale as lot 1120 this is really an outstanding example of this rarity, possessing good color and a sharp fully identifiable reverse. It will be a long time before a comparable specimen becomes available again .Accompanied by an interesting letter from Walter Breen written in 1965 attesting to the coins authenticity and provenance.

COMMENTS

Recently I received a call from a friend of mine,"I'm letting'em go; I sent them off, they're gone," he said. For a split second I thought he was talking about his wife and kids. Then I remembered how he still talks about his wife as his childhood sweetheart and how he adores his children

I decided it must be something even worse. " What are you talking about?" I asked. " The die states'..I sent them in, they're history!"

Thus it was I learned of the sale of an almost complete run of middle dates by variety and die state to take place in January. "Are you getting out of collecting then?" I asked. There was stunned silence on the other end of the line. " Are you crazy?" my friend replied. "I'm putting all th

money into 96's and books!"

The collecting of coins by die state has long been a passion with Large Cent collectors. Sheldon meticulously described die state progressi

in his book Penny Whimsy. Newcomb in many cases gave different die states a completely different classification, as in the case of 1838 N-11 and 13

two varieties struck from the same pair of dies but the latter having developed a large rim cud at the first star. Half Cent collectors for yea

have chased elusive die states of the more dramatically broken dies like 1804 C-6 where a scarce die state will often bring many multiples of the price of a common state.

In part die state collectors owe a large debt of gratitude to the earl

directors of the mint. Dies were expensive to manufacture and the directo

were stingy, or is it more polite to say frugal? In the days where a penn

saved was a penny earned, ten more pennies minted was also a penny earned

So the directors made sure every last penny possible was minted from a se

of dies.If one die broke the remaining die was paired with another. If possible the broken die was repaired and used again. Thus we see instance

where an obverse die is paired with a reverse die, begins to deteriorate, is removed and repaired, and later reused with a different reverse die. The more sturdy dies might be paired with a whole series of other dies. For instance,among Sheldons, reverse X of 1794 is paired with no less then six obverse dies thus earning the sobriquet "the Zsa Zsa" reverse. Similarly an outstanding obverse die such as Obverse 9 of 1800 which appeared with four different reverses might be referred to as a Dolly. Ahem.

The study of die progressions is fascinating. Often a die begins its life fresh ,sharp and pristine only to end with a series of lines,cracks, repairs and rim breaks.Rare die states can appear at both ends of a die's life. N-1 is extremely rare with a perfect obverse devoid of the usual obverse rim crumbling at one o'clock. It is also rare in the terminal die state where a reverse rim cud develops at seven o'clock. 1836 N-6 is rare without the rim break above star eight and will bring a large premium. Only one example of 1833 N-4 is known with the rim cud joining the first three stars; it's value is about that of a small sports car.

In the past most collectors' enthusiasm for die state collecting has been hampered by a lack of information. In part the Jack Robinson sale provided a solution by making available a great deal of information which was formerly difficult to obtain. In many cases a half dozen or more specimens were offered exhibiting as many different states of the dies. The wide range of material created a lot of interest and the resulting prices were in some cases astounding

The Dennis Mendelson Sale to be offered by Superior in January of 199

will be comprised only of middle dates. But the die progressions will be virtually complete. There has never been a die state collection like this assembled before. Not ever Newcomb had the progressions which will be represented. The sale will bring a lot of well deserved attention to die state collecting and the catalog itself will undoubtedly become a standard reference work for middle date collectors.

My friend progressed from collecting Buffalo Nickels, to Early date Large Cents, to middle date die states, to varieties of 1796, to plated Chapman catalogs. It's going to be hard for him to see the years of work invested and some of his most treasured Cents sold. He should take solace in knowing most of them will move to the homes of friends, not strangers. And the work he invested assembling the collection will not be lost but will end in the creation of a valuable new reference work and the legacy of a whole new generation of collectors.
